EXPERIENCE

Petals Studio

Mar 2025 - Present

Unity Game UI Developer

- Re-vamped UI systems using Unity UI Toolkit, designing 6 modular components that improved user experience and code maintainability

Smollan (for Google)

Sep 2024 - Jan 2025

Unity AR Developer

- Developed interactive AR advertisement prototypes using Unity UI Toolkit for Google's marketing campaigns
- Built furniture placement demo enabling real-time interior design optimization and customization using AR and Generative AI

InsightXR

Feb 2024 - May 2024

Unity VR Developer

- Architected Unity VR development package with comprehensive documentation, sample scenes, and API reference
- Implemented motion data serialization pipeline with hand pose tracking, replay functionality, and AWS S3 WebGL deployment

Next Tech Lab

Nov 2022 - Present

Board Member

- Led operations for QS award-winning student research lab covering ML, XR, Game Development, Cybersecurity, and IoT
- Managed recruitment processes and organized technical events including game jams and recruitments.

EDUCATION

SRM Institute of Technology, Chennai, Tamil Nadu

Sep 2022 - Jun 2026

Bachelor of Technology in Computer Science

Coursework: Metaverse (Digital Twinning), Computer Graphics & Animation, AR/VR/MR Course

Certifications: Unity VR, Unity Mobile AR, Unity Associate Game Developer

PROJECTS

Titles as Links

Wand Game VR | *Unity3D, XR Interaction Toolkit, Blender, C#, JSON.Net*

- VR spell-casting experience using Procrustes analysis for instantaneous letter recognition from air-drawn gestures
- Designed modular system enabling open-source contributions of additional spell shapes and patterns

Walmart Interactive | *Unity3D, XR Interaction Toolkit, C#, GLB Pipeline*

- Collaborated on VR application for Walmart Sparkathon integrating real-time item registration and dynamic 3D model generation
- Developed VR frontend enabling runtime retrieval of product models and data from external databases

Project Vasundhara - 1st Place Winner | *Unity3D, XR Interaction Toolkit, Blender, JSON*

- Award-winning VR chemistry education platform for elementary to middle school students using minimalist 3D rendering
- Created JSON-driven modular crafting system demonstrating real-world chemistry applications through interactive molecular assembly

Ray Engine | *C#, RayLib-cs*

- Custom game framework built on RayLib with Unity-inspired component architecture for intuitive object management
- Studied graphics programming and engine design principles to create lightweight, performance-focused development environment

Project Birch | *C#, Compiler Design*

- Custom programming language interpreter demonstrating deep understanding of language design and compiler theory
- Implemented core language features including variable scoping, array handling, and function definitions with proper lexical analysis

SKILLS

Languages - C, C#, C++, Java, Python

Technologies - Unity3D, Blender3D, AR Foundation, XR Interaction Toolkit, AWS S3, JSON.Net, WebGL

Specializations - VR/AR Development, 3D Graphics, Game Engine Architecture, UI/UX Design

ACHIEVEMENTS

CAD 2.0 Hackathon - 1st Place - VR EdTech Application (Project Vasundhara) [\[Link\]](#)

Walmart Sparkathon - Finalist - VR 3D Catalog Viewer with Dynamic Model Loading [\[Link\]](#)
